

Drop infeed Chipper

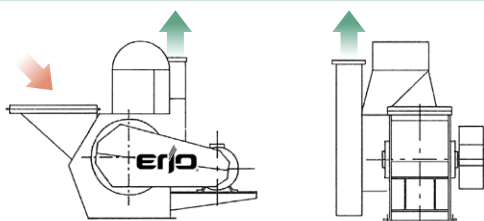

Erjo Type VS

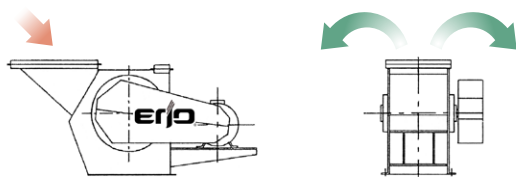

Erjo Drop infeed Chipper produces pulp and board chips, as well as biofuel wood chips from sawmill waste, slabs, edgings and trimmings.

The Erjo VS Chippers are available in the following three different designs:

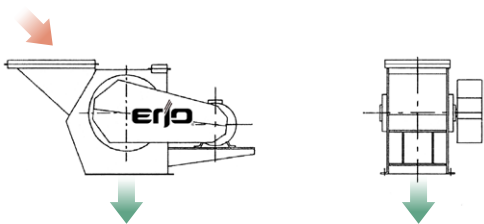

Type VSF with fan for long blow distances.

Type VSU with guiding hood for short blow distances.

Type VSB with bottom discharge.

The Erjo Type VS Chippers are manufactured in the following standard sizes:

Chipper Type VS	60VS	90VS
Infeed width	70 cm	70 cm
Rotor Ø	60 cm	90 cm
Knives (pcs)	4 st	4 st
Capacity	60 m ³ /h	120 m ³ /h
Power consumption	55-90 kW	110-160 kW

Please contact us for further technical information.

- Self feeding drop input.
- Reliable operation.
- The inlet hopper has an openable bottom hatch, to simplify service and inspection of the anvil.
- Adjustable knife support system for variable chip lengths.
- Screen cassette system for rechipping of oversized chips.
- Basic and robust design.
- Hardox steel in outlet.
- Low maintenance costs.
- Long service life.
- The leakproof design provides a clean and fireproof work environment.
